Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 10 as currently amended and 2, 3, 4, 5, and 6 as currently presented, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kloen et al. (WO 00/350013) in combination with Thakur et al. (US publication 2006/0030162).

With respect to claim 1 and 10 as currently amended and 2, 3, 4, 5, and 6 as currently presented, Kloen et al. teach the claimed invention. See the final rejection dated 11/29/05.

Further with respect to claims 1 and 10 as currently amended, Kloen et al. fail to teach using tetraoxysilane or TEOS as dielectric material.

Thakur et al. teach using tetraoxysilane or TEOS as dielectric material to gain better control of fabrication process and better step coverage. See [0023].

It would have been obvious to one of ordinary skill in the art of making semiconductor devices to incorporate the above teaching of Thakur et al. into the device of Kloen et al. to achieve benefit.
